Summary:

I am an iOS Developer and Designer responsible for multiple apps in the App Store. I'm passionate about creating things that work well and look beautiful. I am looking for iOS Developer positions in Boston, MA.

Education:

Wheaton College Norton, MA

09/2010 - 05/2013

B.A. Computer Science and Interface Design (completed a four-year degree in three years)

Honors: Dean's List, Wheaton College Balfour Scholarship, Rotary Club Scholarship, Best Buy Community Service Scholarship, GPA: 3.47

École Rudolf Steiner de Lausanne, Lausanne, Switzerland 2009

Mobile Makers Academy, Chicago, IL

09/2014 - 11/2014

Mobile Makers is a full-time, 8-week intensive iOS development course that covered Objective-C, Core Data, Delegation, Agile Development, Parse, Git, Xcode, paired programming and many of Apple's fundamental frameworks

- Completed more than 500 hours of study during the Mobile Makers course
- Developed more than 30 small apps

Technical Skills:

iOS Development in iOS 8 & 9: Swift, Objective-C, Xcode, AVFoundation, Core Data, Core Animation, Core Image, Core Location...

Web Technologies: RESTful Interfaces, JSON, HTML, CSS

Cloud Services: Instagram API, Facebook and Twitter Social SDKs, YouTube & MeetUps APIs, Parse Framework(RIP)...

Source Control: Git, GitHub

Methodologies: Agile, Scrum, Pair Programming

Design Patterns: Delegation, Model View Controller, Grand Central Dispatch, Singletons

Applications: Photoshop, Illustrator, InDesign, Final Cut Pro, Premiere Pro, After Effects, Sketch, Reveal

Other Programming Languages: Python, Javascript, Java

Work Experience:

Lead iOS Developer, Kaymbu, Boston, MA - kaymbu.com

01/2015 - Present

I am the iOS Department at Kaymbu.

- I rewrote Kaymbu's main iPad app from the ground up. I improved the camera capture speed over 5x, increased the quality of photos and videos users can take, and filled the app with many other improvements from backend enhancements to front end animations. The Kaymbu app is used by teachers to capture moments throughout their day. Teachers tag students, add comments and more, before scheduling and sending a weekly digest to the parents.
- I created the universal app, Daily Note. An app where teachers capture their student's daily activities and email them easily to parents. Daily Note supports multiple logins and syncing across devices, as well as student sync from the Kaymbu App.

iOS Development Intern, Empower Mobility, Burlington, VT

06/2014 - 08/2014

Worked on new client project doing research and development. Demoed work to client.

Personal Projects:

The Smirkus App - iPhone & iPad app: Features: The current tour schedule, directions to all shows, calendar reminders, a media feed using Instagram & YouTube APIs, and more.

Download: appstore.com/circusmirkus

Alien Digest - iPhone app: Yahoo News Digest for Reddit. Pick from the trending subreddits or choose your own to create your bi-daily, reddit digest. Built with Richmond Watkins and Chris Ruggles.

Download: appstore.com/aliendigest

Pocket Memos - iPhone app: An intuitive, easy to use voice recording app. Record in different formats, upload to dropbox and email recordings.

Download: appstore.com/pocketmemos

Tic Tac Toe - iPhone app: A tic tac toe app with basic AI. This was our first weekend project at Mobile Makers.
